Ämne: Tesla testing Level 2 autonomy in Enköping

Hello,

We would like to submit a request to test Tesla's Full-self driving (supervised), a level 2 autonomy system in Enköping, which would always be under a supervision of a driver. We have already submitted the request to test to the Swedish Transport Agency (TSV 2025-3611 - Application for trial operation with automated vehicles), but these applications also need approval from municipalities where these tests would be conducted.

Please let us know what would be the procedure to obtain the positive approval to test in Enköpingmunicipality. We do not have any limitations to specific roads or conditionality to test in some parts of the day. We have tested over more than 600,000 km in Europe and we are only starting to do the same in Sweden.

An example of the type of tests we run in other European roads can be found on these 2 links:

- Paris: <https://x.com/teslaeurope/status/1923302585034756360>
- Amsterdam: <https://x.com/teslaeurope/status/1908573920296415451>

Kind regards,
Ivan Komusanac
